Explor Resources is a junior gold and base metals exploration company with mineral holdings in Ontario, Quebec, New Brunswick and Saskatchewan. Current exploration activity is focused on the 4 properties in the prolific Abitibi Greenstone Belt in Ontario and Quebec and one in the New Brunswick "Bathurst Mining Camp".

**ABITIBI GREENSTONE BELT**

The Abitibi Greenstone Belt is unique amongst the greenstone belts of the Canadian Shield in that it has a high ratio of supracrustal to intrusive rocks. It has a generally low metamorphic grade and is known to have a diverse spectrum of richly mineralized deposits. The belt is found in both provinces of Ontario and Quebec with approximately 33% in Ontario and 67% in Quebec. The belt has produced in excess of 180,000,000 ounces of gold and more than 450,000,000 tons of Cu-Zn ore to date. Explor’s combined land position in the AGB is over 25,000 hectares.
